Summary

Full Stack Developer & Tech Lead with 12+ years of experience building scalable web and mobile platforms in distributed, remote-first teams. Strong background in TypeScript, Node.js, GraphQL, microservices, and AWS serverless architectures.

Proven track record owning system architecture, improving performance and reliability, and leading engineers across complex B2B platforms. Fluent in Spanish (native), English (B2), and Italian (B2).

Professional experience

TUI – Remote, Spain

Tech Lead – January 2026 – Present

Senior Software Engineer – June 2024 – December 2025

Promoted internally from Senior Software Engineer to Tech Lead in January 2026, in recognition of technical leadership, impact on delivery, and ownership across critical B2B systems.

- Provide technical leadership for B2B systems, owning architecture, technical direction, and engineering standards across multiple European markets.
- Drive technical strategy and roadmap execution, balancing delivery speed, technical debt reduction, and platform stability.
- Lead and mentor engineers, conduct code reviews, define best practices, and support professional growth across the team.
- Own system architecture and technical decision-making for payment, booking, and accessibility-critical platforms, ensuring scalability, resilience, and long-term maintainability.
- Improve platform reliability and performance, maintaining 99.7% uptime through proactive monitoring, observability, and operational excellence.
- Act as an escalation point for complex technical challenges, unblocking teams and driving cross-team alignment.
- **Key impacts as Senior Software Engineer:**
 - Reduced payment processing errors by 40% by implementing multi-currency validation logic.
 - Improved booking completion time by 60% (8 min → 3.2 min) through intelligent passenger data prefill.
 - Decreased average API response times by 35% via optimized GraphQL resolvers and service patterns.
 - Achieved 100% WCAG 2.1 AA compliance for assisted travel features, reducing validation errors by 45%.
 - Maintained 90%+ unit test coverage and 95% SonarQube compliance.
 - Optimized CI/CD pipelines, reducing build times by 39% and improving deployment reliability.

Technologies: TypeScript, JavaScript (ES6+), Node.js, React, Preact, GraphQL, Apollo, REST APIs, HTML5, CSS3, Sass, Micro Frontends, Microservices, BFF, Serverless, Express.js, AWS Lambda, AWS API Gateway, AWS DynamoDB, AWS S3, AWS CloudFormation, AWS CloudWatch, AWS Secrets Manager, AWS AppConfig, AWS CDK, CI/CD, Jest, Observability, Accessibility (WCAG 2.1 AA), Performance Optimization, Datadog

Soft Skills: Technical Leadership, Software Design, Agile, Scrum, Collaboration, Mentoring, System Architecture

Tools: Git, GitLab CI/CD, Projen, Jira

Rithum – Remote, Spain

Software Engineer – July 2023 – June 2024

- Contributed to large-scale logistics and fulfillment systems, supporting rate optimization, shipping, warehouse management, and shipment processing.
- Improved shipment processing reliability by developing and maintaining distributed microservices handling rates, labels, and warehouse workflows.
- Reduced production defects by implementing unit and functional tests across critical data pipelines.
- Accelerated feature delivery by contributing to an end-to-end data testing framework.
- Enhanced system observability with structured logging and monitoring, improving incident detection and resolution.
- Supported multiple Node.js runtime migrations (12 → 18), ensuring backward compatibility and stability.

Technologies: Node.js, TypeScript, AWS Lambda, DynamoDB, AWS (Lambda, DynamoDB, SQS, S3, CloudWatch), Datadog, MongoDB, REST APIs, GitHub CI/CD, Microservices

Docebo – Remote, Italy / Spain

Full Stack Developer – Mobile & Web – June 2020 – June 2023

Backend Developer – February 2020 – May 2020

Promoted internally from Backend Developer to Full Stack Developer in June 2020, reflecting increased responsibilities in web and mobile development.

- Migrated legacy e-commerce components to microservices, including payment gateways, coupons, and transaction systems.
- Delivered end-to-end features across subscriptions, catalogs, and course management using Angular, PHP (Yii2), and Node.js.
- From 2022 onward, owned mobile app configuration and shared business logic for React Native applications.
- Implemented unit and functional tests to ensure software quality, reliability, and maintainability.
- Collaborated with product, QA, and design teams in a remote-first, agile environment.

Technologies: Angular, PHP (Yii2), Node.js, React Native, REST APIs, Microservices, MySQL

DevCenter – Elche, Spain

Frontend Developer – June 2018 – January 2020

- Developed multiple business-critical web applications for academic institutions, law firms, and public sector organizations.
- Delivered end-to-end frontend solutions for payment platforms, time-tracking systems, and government websites.
- Improved usability and maintainability by applying modular Angular architectures and reusable component patterns.
- Collaborated closely with designers and backend teams to ensure consistent UX and reliable integrations.

Technologies: Angular, HTML5, SCSS

Freelance – Alicante, Spain

Full Stack Developer & SysAdmin – April 2014 – April 2018

- Designed, developed, and maintained custom web solutions and infrastructure for small businesses and personal projects.
- Delivered e-commerce platforms using PHP-based stacks and CMS solutions, tailored to client requirements.
- Managed Linux servers and hosting environments, handling deployment, security, and maintenance.
- Improved system reliability and performance through infrastructure optimization.

Technologies: PHP, MySQL, JavaScript, Angular, Debian, VestaCP

CMS: WordPress, PrestaShop

Webpositer – Alicante, Spain

Full Stack Developer & SysAdmin – December 2012 – May 2018

- Developed SEO-focused web platforms and e-commerce solutions while managing production infrastructure.
- Created custom WordPress plugins and e-commerce solutions, improving client visibility and performance.
- Managed and maintained multiple production servers, ensuring uptime, security, and scalability.
- Supported SEO optimization efforts through technical improvements and performance tuning.

Technologies: PHP, MySQL, JavaScript, Debian, CentOS, REST/SOAP APIs

CMS: WordPress, PrestaShop

Education

- **Bachelor's Degree in Computer Engineering** – Universitat Oberta de Catalunya (Online) – Currently
- **Higher Vocational Education in Multiplatform Applications Development** – IES San Vicente, Alicante, Spain – 2019
- **Higher Vocational Education in IT Systems Management and Network** – IES Doctor Balmis, Alicante, Spain – 2012

Skills

- **Programming Languages & Frameworks:** TypeScript, JavaScript (ES6+), Node.js, GraphQL, React, Preact, Angular 2+, PHP (Yii2), React Native, REST APIs, HTML5, SCSS/Sass
- **Frontend Development:** Micro Frontends, Accessibility (WCAG 2.1 AA), Responsive Design
- **Backend & Microservices:** Microservices, BFF (Backend for Frontend), Serverless (AWS Lambda), Express.js, Apollo Server, OpenAPI
- **Cloud & DevOps:** AWS (Lambda, API Gateway, DynamoDB, S3, CloudFront, CloudWatch, Secrets Manager, AppConfig), AWS CDK, CI/CD (GitLab CI, GitHub Actions), Docker, Datadog, SonarQube
- **Database & Storage:** DynamoDB, PostgreSQL, MongoDB, MySQL, S3, SurrealDB
- **Testing & Quality:** Jest, Playwright, Contract Testing (Pact), Property-based Testing (fast-check), Testing Library, ESLint, Prettier
- **Version Control & Collaboration:** Git, GitHub, GitLab

Language

- **Spanish – Native**
- **English – B2**
- **Italian – B2**

Training

- **Algorithms & Data Structures: 300 h**
- **Agile / Project Management: 99 h**
- **Java & Spring: 78 h**
- **React & React Native: 57 h**
- **JavaScript & TypeScript: 55 h**
- **Angular: 47 h**
- **Android (mobile fundamentals): 50 h**
- **Node.js & Backend: 48 h**
- **Docker / DevOps / CI-CD: 23 h**
- **AWS & Cloud (including CLF-C02): 14 h**
- **Databases & SQL: 3 h**
